

- Remove the structure from the packaging.
- Undo the Velcro tape.
- Place the structure on the floor so that the velcro tape is lying on the floor by your feet.
- Partly open out the structure until it is about 0,5 x 0,5 m.

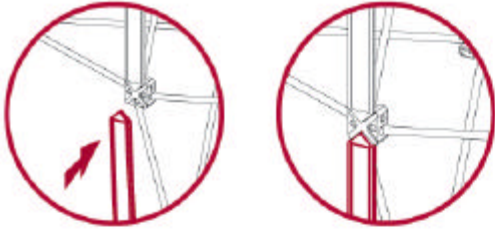

- Hold the structure by the tubes above the hubs marked in the picture.
- Lift the structure, so that the marked hubs are pointing towards you, and expand to its full size.
- Place the erected structure on the floor.

- Press the marked pairs of hubs towards each other until the magnetic lockers connect.

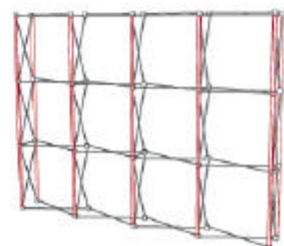

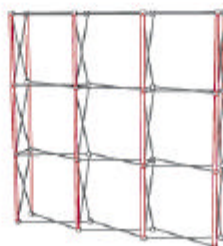

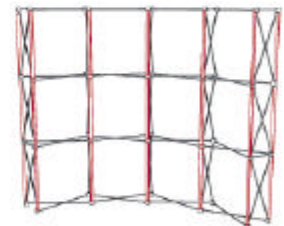

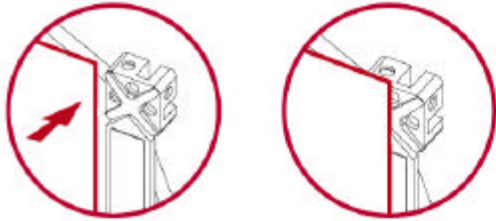

- Unwrap the magnetic bars and attach them to the magnets in the hubs.

- The structure is ready for installing the graphics.

Never slide the magnetic bars on top of each other, it would damage the magnetic field!!!

- It is advisable to allow the graphic panels to lie flat for about 30 min before placing onto the structure.
- The graphic panels are attached by hanging the magnetic hangers onto the magnets in the top row of hubs.
- The graphic panels are attached by hanging the „hook“ on the panel onto the heart-shaped panel pegs along the top row of hubs.
- To hang the graphic panels start with either the left or right front panel, NOT the centre. Then continue in sequence. To finish place the two endcap panels.
- To dismantle remove in reverse order. First remove the endcap panels etc.
- Always roll the graphic panels with the printed side outwards.
